

Talking Together

Spirals are a very special pattern. A pattern that happens naturally in nature.

Have a go at making your own spirals. Start from the middle and get bigger and bigger!

Different kinds of snail have different kinds of shell, some are long and thin. Have a look at the differences. Can you look for other patterns that happen in nature?

Talking Together

Take your spiral to the next level and make a spiral dangler!

Take a paper plate or a circle of paper/card and draw your spiral. Cut directly on top of your spiral line from outside to the middle. Let your spiral dangle. Where will you put yours?

If you want to make it more special decorate your plate first!

Try making your own spiral snack

Talking Together

You will need:

Wraps, chocolate spread and a knife to spread and cut.

Spread your spread all over your wrap.

Roll up tightly.

Cut into slices

See the snail shells!

Have fun eating some subtraction snails!

If you don't have wraps and chocolate spread, you can achieve the same effect by using slices of white bread.

Cut the crusts off two (or more) slices of white bread.

Lay them next to each other with the short edges overlapping slightly and use a rolling pin to roll the bread flat and join the edges together so you have one long piece of bread.

You can then use any spread or filling, roll up tightly and slice like the pictures above.
