Reasoning 1

Modelled DAB Reasoning Responses

D – One sentence is missing 'metres' and the other is missing 'centimetres'.

A – A tree is about 4 **metres** tall.

A pencil is about 15 **centimetres** long.

B – A tree is much bigger than a pencil so it should be measured in metres using a metre stick. A pencil only needs to be measured in centimetres using a ruler.

Reasoning 2

Modelled DAB Reasoning Response

D – Ranjit has made a mistake.

A – His fingernail cannot be 7m long.

B – He must have used the wrong unit of measurement. Fingernails are small so should be measured using millimetres not metres. Ranjit's fingernail must be 7mm long.

Reasoning 3

Modelled DAB Reasoning Response

D – Both Jane and Marlon are correct.

A – The route is 2m 75 cm or 275cm.

B – They have both calculated the length of the track and got the same answer but have written it using different units of measurement. 2m 75cm is the same as 275cm.

Equivalent lengths – m and cm

- 1 There are 100 centimetres (cm) in 1 metre (m).
Use the bar models to complete the sentences.

Tom's sunflower is exactly halfway between Huan's and Dani's.

How tall is Tom's sunflower?

Write your answer in metres and centimetres.

Reasoning 1

Modelled DAB Reasoning Responses

D – Jerry has made a mistake.

A – 62mm is not 60cm and 2mm

B – 62mm is 6cm and 2mm not 60cm and 2mm. There are 10mm in 1 cm so $60 \div 10 = 6\text{cm}$ not 60cm.

Reasoning 2

Modelled DAB Reasoning Response

D – I can order the measurements from largest to smallest.

A – I need to convert all the lengths to the same unit of measure.

B – $2\text{cm} = 20\text{mm}$

$3\text{cm and } 4\text{mm} = 34\text{mm}$

$9\text{cm} = 90\text{mm}$

$5\text{cm and } 2\text{mm} = 52\text{mm}$

Reasoning 1

Modelled DAB Reasoning Responses

D – Marlon is correct.

A – 1m 32cm is taller than 1m 25cm.

B – 1m 32cm = 132cm and 125cm = 1m 25cm

1m 25cm

1m 32cm

Reasoning 2

Modelled DAB Reasoning Response

D – True

A – Half a metre is 50cm.

B – 1m = 100cm so half a metre is 50cm because half of 100 is 50.

D – False

A – 4m is not equivalent to 800cm.

B – 1m = 100cm so 4m = 400cm

800cm = 8m.

Problem Solving 1

The distance between the fairground and the school is: $165\text{cm} \times 2 = 330\text{cm}$ or 3m 30cm.

The distance between the café and castle is $200.5\text{cm} + 87\text{cm} = 287.5\text{cm}$ or 2m 87.5cm

The distance between the café and the fairground is 200.5cm or 2m 5mm.

The distances written in m and cm are:

Café – School: 2m = 200cm

School – Castle: 165cm = 1m 65cm

Castle – Fairground: 3m = 300cm

Farm – Café: 401cm = 4m 1cm
